

Who We Are

We are the Engineers Without Borders (EWB) Chapter at the University of British Columbia. At our chapter, our mission is to build the capacity of young leaders to create a thriving and sustainable world. Some of our recent work includes:

- Creating a food redistribution application, Scrapless, to mitigate food waste and promote sustainability.
- Establishing the Global Engineering Certificate to ensure that tomorrow's engineer has the skills and tools to drive social impact.
- Delivering free educational workshops that empower high school students to become active citizens and leaders.
- Sending one UBC student to support EWB's social enterprises and governance programs in sub-Saharan Africa through the Junior Fellowship program
- Advocating for improved development aid from the federal government

Our diverse portfolio of work has local, national, and international impact, but they all have one common goal: to ignite change that tackles issues of poverty and inequality

As a sponsor, you can help make our work possible. We welcome you to join us in our efforts to create positive change. In this package, you will find more information about our chapter and the work that we do.
